Optional: Please explain any special features in the statistics, e.g. due to changes in the degree programme during the pandemic or other reasons.

The M.Sc. in Environmental Sciences programme at Maasai Mara University has faced a range of challenges and changes in recent years, driven by a variety of factors.

The COVID-19 pandemic has had a significant impact on the program, with the shift to online learning affecting enrollment numbers and international student recruitment. In response to these disruptions, the program has implemented several modifications. New specializations and tracks have been introduced to cater to emerging industry needs. The program's marketing and outreach efforts have also evolved, with enhanced international recruitment campaigns and targeted outreach to underrepresented groups. These initiatives have contributed to increased diversity within the student population and improved the program's visibility through rankings and accreditations. Socio-economic factors, such as economic downturns.
